

Premier Information Technology (IT) Company  
NVC2092

For decades, this Midwest based Company has offered information technology installation and maintenance for a loyal and diverse customer base that expects value, service and engineering excellence. It specializes in the design, implementation, and support of small and medium networks, as well as large-sized infrastructure projects for varied industries. The Company succeeds by being result oriented, responsive, innovative, and customer-focused. This philosophy has resulted in many long-term IT contracts. The Company has the expertise, speed and scale to help a diversified client base.

The Company has experienced significant growth and demand. With revenues of less than \$4 million, the Company is well-poised for ongoing success and growth.

## INVESTMENT HIGHLIGHTS

---

**Certifications** – The Company’s staff is certified in a broad range of technologies, including the niche sector of wireless. Extensive continuous education training keeps them current in the latest technologies. Its engineers and technicians are specially trained and certified to support and service many leading manufacturers’ products.

**Help Desk/Call Center** - The company team prides itself on a professional and knowledgeable Help Desk. The Company utilizes remote access to solve issues and guide clients toward workplace optimization. This enables customer to eliminate excessive expenses and extensive downtime, increasing workplace productivity.

**First Class Performance** – The Company offers tailored business solutions to a variety of industries. Many depend on it to design and install IT systems, develop critical applications, and to manage and maintain networks. The Company understands how critical IT capabilities and infrastructure are for its clients’ success.

**Well-Established Reputation for Experience** – The Company has the contracts and dedicated professional staff to deliver best-value solutions for storage, enterprise operations, e-business, and information & infrastructure assurance. The Company has the expertise to supply its diversified clients with the comprehensive service they expect.

**Long Term Contracts** – Since all of the Company’s services and solutions can be customized and bundled to meet client needs and are delivered through a single point of contact, client value is enhanced. It has many long-term IT contracts because of its commitment to excellence and loyal customer base.
