

Asphalt Company NVC2083

For many years this Company has been dedicated to the maintenance of asphalt surfaces, including quality seal coating, infrared repairing, striping, and crack sealing for the commercial and business industries. With its large array of equipment, it is able to complete a wide variety of jobs.

The comprehensive product and services quality processes and procedures have facilitated the Company's steady and consistent growth. With revenue of nearly \$1 million and an EBITDA of close to \$200,000, it is well-poised for continued success.

INVESTMENT HIGHLIGHTS

Environmentally Sensitive – Only the highest quality materials are used. To meet the demand for green alternatives, the Company utilizes incredibly strong, environmentally friendly applications.

Diverse Service Offering – The Company specializes in exceptional infrared repair, overlay of existing asphalt, repair of damaged asphalt, crack repair, seal coating to maintain asphalt surfaces, and striping as per existing and new layouts.

In-depth Knowledge – Experience is the key to successful and mistake-free projects. The Company's staff takes tremendous pride in their work and is committed to excellence in workmanship.

Customer Satisfaction – A commitment to excellence and competitive pricing is recognized in the community and has earned it a reputation for top notch customer satisfaction.

GROWTH OPPORTUNITIES

Grow Market Share – There is potential to further diversify its service offerings to include paving, sweeping and winter maintenance such as snow plowing.

Promote Marketing with Emphasis on "Green" – As more consumers take pride in making every effort to protect the environment, there is significant opportunity to promote the Company's commitment to environmentally friendly products and applications.

Greater Internet Presence – Much of the work is the result of recommendations from previous customers who have spread word of their satisfaction. A more robust Internet presence such as a company website that is enhanced by web marketing, e-brochures, and search engine optimization (SEO) would be beneficial.
