

Full Service Industrial Maintenance Provider NVC2095

For many years, this Company has been providing complete, high quality industrial, commercial and municipal cleaning, rehabilitative maintenance, environmental and safety services. It specializes in water and CO2 (dry ice) blasting, wet and dry vacuuming and management of facility sanitation maintenance. Utilizing leading edge technology, it offers total project organization ranging from daily maintenance to single job contracts, managing both hazardous and non-hazardous materials. These innovative services reduce clients' costs, minimize waste volumes and protect the environment. Ideally located, the client list is diversified and includes varied size companies. The Company has extensive experience in the ethanol, food, plastic, chemical, automotive, and steel industries.

This combination of historical presence, very large metro area location, technical innovation and flexibility has defined the Company's commitment to setting the industry standard for customer service.

INVESTMENT HIGHLIGHTS

Location – The Company is strategically located close to a very large Midwest metropolitan area which enables it to service a sprawling customer base. This prime location is home to many industrial and commercial companies, as well as municipalities.

Diverse & Loyal Customer Base - The Company's proven performance in the areas of quality control, reliability and customer service has given it an extraordinary track record. With vast expertise working in the ethanol, food, plastic, chemical, automotive, and steel industries, the Company has a diversified client base. Efforts to be exceptional and a commitment to long-term business relationships have resulted in many long term customers

Safety – Providing a healthy and safe work environment for its customers is paramount. The Company offers a comprehensive range of solutions that satisfy environmental needs.

Customer Service - The Company's first priority is always addressing the varied needs of its customers. Working closely with customers, it identifies the most compliant and cost-effective options. The Company differentiates itself from competitors by focusing on prompt and attentive service. Its total quality solutions are offered 24 hours a day, 7 days a week. The Company's convenient website offers detailed information about services offered.

Certification – Full compliance with all applicable regulatory, health and safety requirements are continually met. It is certified by the state's Department of Transportation.

GROWTH OPPORTUNITIES

Marketing & Sales - Growth could be stimulated by adding in-house sales staff and increasing direct mail efforts. A greater Internet presence, enhanced by search engine optimization, web marketing and e-brochures, would be beneficial.

Industry Expansion - Expansion into the water treatment, wastewater treatment, pharmaceuticals, and biofuel industries could increase the customer base and create opportunities for additional revenue.

Relocation - While the Company has been established at its current location for many years, it could be easily relocated to another location at minimal costs.
